

Day 1 and Day 2 HTML & CSS Assignments

Technology: HTML5 + CSS3

1. AI Resume Builder Landing Website

Problem Statement:

You are hired by a startup called ResumeAI to build a professional landing website for an AI-powered resume builder. The website should attract job seekers and showcase the product.

Modules:

- Responsive Navigation Bar
- Hero Section with CTA
- Trusted Companies
- Features (8 Cards)
- Resume Templates Gallery (6 Cards)
- Pricing Plans (Free, Pro, Enterprise)
- Testimonials
- FAQ using <details> and <summary>
- Contact Form with HTML5 Validation
- Footer

CSS Requirements:

- External CSS only
- Flexbox & CSS Grid
- CSS Variables
- Hover Effects & Transitions
- Fully Responsive using Media Queries

2. Hospital Appointment Booking Website

Problem Statement:

Design a responsive website for a multi-specialty hospital where patients can explore doctors and book appointments.

Modules:

- Navigation
- Hero Banner
- Departments (8 Cards)
- Doctors (8 Cards)
- Statistics
- Patient Testimonials
- Appointment Form
- Footer

CSS Requirements:

Responsive layout, Grid, Flexbox, Cards, Hover Effects, Media Queries.

3. Online Food Delivery Website

Problem Statement:

Build a landing page for an online food delivery startup similar to Swiggy or Zomato.

Modules:

- Navigation
- Hero with Search
- Food Categories
- Featured Restaurants (12 Cards)
- Offers Banner
- Why Choose Us
- Customer Reviews
- Download App Section
- Contact Form
- Footer

CSS Requirements:

Modern UI, Responsive Cards, Grid, Flexbox, Animations, Media Queries.

4. Online Learning Platform

Problem Statement:

Develop a professional coding institute website to promote online courses and student enrollments.

Modules:

- Hero Section
- Courses (8 Cards)
- Why Choose Us
- Student Success Statistics
- Trainers
- Testimonials
- Upcoming Batches Table
- Admission Form
- Footer

CSS Requirements:

Responsive Design, Flexbox, Grid, Variables, Professional UI.

5. Travel & Tourism Booking Website

Problem Statement:

Develop a travel agency landing page that allows users to discover destinations and submit travel enquiries.

Modules:

- Navigation

- Hero Banner
- Popular Destinations (12 Cards)
- Holiday Packages
- Gallery
- Why Choose Us
- Testimonials
- Travel Enquiry Form
- Footer

CSS Requirements:

Responsive Layout, CSS Grid Gallery, Flexbox, Hover Effects, Media Queries.

Common Requirements

- Use semantic HTML5 tags.
- External CSS only.
- Use Flexbox and CSS Grid.
- Responsive for Mobile, Tablet and Desktop.
- Meaningful images with alt attributes.
- HTML5 Form Validation.
- Clean folder structure (index.html, css/, images/).
- Upload source code to GitHub.
