

Day 5 JavaScript Assignments

Topics: Strings, Functions, Objects

Problem 1: User Profile Formatter

Business Scenario

You are building a social media profile module.

Sample Input

```
const  
user={firstName:"Anand",lastName:"Yadav",email:"anand@gmail.com",city:"Agra",isVerified:  
true};
```

Requirements

- Create formatUserProfile(user).
- Return full name in uppercase.
- Extract username from email.
- Display Verified/Not Verified.
- Return formatted profile.

Expected Output

Full Name: ANAND YADAV

Username: anand

City: Agra

Status: Verified User

Problem 2: E-Commerce Product Search

Business Scenario

Develop search functionality for an e-commerce site.

Sample Input

```
const products=[{name:"Gaming Laptop",price:75000},{name:"Wireless  
Mouse",price:1200},{name:"Office Chair",price:6500}];
```

Requirements

- Create searchProduct(keyword).
- Use string methods for case-insensitive search.
- Display matching products.
- Show 'No Product Found' if nothing matches.

Expected Output

Search: laptop

Gaming Laptop - ₹75000

Problem 3: Student Report Generator

Business Scenario

Generate reports for an LMS.

Sample Input

```
const student={name:"Rahul",course:"JavaScript",marks:[85,91,78,88]};
```

Requirements

- Create calculateAverage(student).
- Calculate average.
- Assign Grade.
- Generate final report string.

Expected Output

Average: 85.5

Grade: A

Eligible for Certificate

Problem 4: Restaurant Menu Manager

Business Scenario

Manage restaurant menu data.

Sample Input

```
const menu={restaurant:"Food  
Hub",items:[{name:"Burger",price:250},{name:"Pizza",price:450},{name:"Pasta",price:300}]  
};
```

Requirements

- Create displayMenu(menu).
- Print items in uppercase.
- Find most expensive item.
- Display total items.

Expected Output

BURGER

PIZZA

PASTA

Most Expensive: Pizza

Problem 5: Employee Directory

Business Scenario

Build an HR employee directory.

Sample Input

```
const  
employees=[{name:"Aman",department:"IT",salary:60000},{name:"Priya",department:"HR",  
salary:50000},{name:"Neha",department:"IT",salary:70000}];
```

Requirements

- Create filterDepartment(dept).
- Display IT employees.
- Calculate average salary.
- Generate summary.

Expected Output

IT Employees: Aman, Neha

Average Salary: ₹65000
